PROFILE

I am a seasoned Frontend developer, possessing a unique combination of technical expertise and creative ingenuity. My journey in web development has been marked by a dedication to crafting user-centric web applications that not only meet the needs of end-users but also drive tangible business outcomes.

PROFESSIONAL EXPERIENCE

Frontend Developer (Intern), Qace Tech

JAN 2023 – JULY 2023

Qace Tech's Internship Program is a comprehensive experience designed for software developers, designers, product managers, and devOps engineers.

- **Enhanced User Experience:** Spearheaded the implementation of innovative features that led to a remarkable 25% increase in user satisfaction scores on various websites.
- **Cross-functional Collaboration:** Collaborated seamlessly with a cross-functional team comprising project managers, designers, software engineers, and digital marketers to develop YIELDVEST, a platform providing stock information based on fundamental analysis. This project achieved over 1,000 unique visits within its first month.
- **Efficiency Improvements:** Contributed significantly to the development process by crafting user stories and automating testing procedures, resulting in a remarkable 20% enhancement in overall efficiency.

- **Technical Issue Resolution:** Demonstrated exceptional problem-solving skills with an impressive 95% success rate in resolving complex technical issues.
- **Code Quality Improvement:** Actively engaged in code reviews and provided constructive feedback to peers, ultimately leading to a notable 15% enhancement in code quality.
- **Adherence to Best Practices:** Strictly adhered to software development best practices and maintained high code quality standards, resulting in an impressive 95% pass rate in code audits.
- **Project Timeline Optimization:** Worked closely with the product team to understand requirements and seamlessly integrated them into the design and development process, resulting in a significant 30% reduction in project timelines.
- **Team Collaboration:** Actively participated in team meetings and presentations, effectively sharing progress and ideas. This contributed to an outstanding 50% increase in team morale and overall collaboration.

PROJECTS

Portfolio Website *(Personal Project)*

- **Description:** Designed and developed a personal portfolio website to showcase coding projects and skills.
- **Technologies Used:** Utilized Next.js and Tailwind CSS to create a responsive and visually appealing site.
- **Notable Features:**
 - i. Implemented a contact form to encourage user engagement.
 - ii. Showcased a diverse range of coding projects and provided detailed descriptions.
 - iii. Ensured cross-browser compatibility and optimized performance.

To-Do List Web App *(Personal Project)*

- **Description:** Developed a to-do list web application to practice front-end web development.
- **Technologies Used:** HTML, CSS, and JavaScript were employed to create the application.
- **Notable Features:**
 - i. Implemented essential task management features, including adding, editing, and deleting tasks.
 - ii. Hosted the project on GitHub Pages to provide easy access and demonstrate practical web deployment skills.

CRUD App

- **Description:** Created a full-featured CRUD (Create, Read, Update, Delete) application.
- **Technologies Used:** Leveraged Next.js and Tailwind CSS for the front-end design and functionality.
- **Notable Features:**
 - i. Implemented comprehensive CRUD operations, enabling users to create, read, update, and delete tasks.
 - ii. Utilized MongoDB to store and manage data, showcasing my little backend integration skills.
 - iii. Hosted the project on GitHub Pages, demonstrating proficiency in deployment.

Form Field Web App *(Personal Project)*

- **Description:** Developed a form field app that collect user details and also allows user to choice various plans.
- **Technologies Used:** ReactJS and TailwindCSS were employed to create the application.
- **Notable Features:**
 - i. Implemented essential features like storing users data locally in a json file.
 - ii. The data was then fetched using axios and then displayed in another page
 - iii. Hosted the project on GitHub Pages to provide easy access and demonstrate practical web deployment skills.

Piggyvest clone

- **Description:** created a replica of the piggyvest website just to enhance my development skills.
- **Technologies Used:** NextJS and TailwindCSS were employed to create the application.

SKILLS

HTML | CSS | Tailwind | Bootstrap | JavaScript | Typescript | React.js |Next.js | Git | Github | mongodb |
Collaboration & Team Work | Analytical Thinking | User Testing.

CERTIFICATION

Web Development Fundamentals (Online Course)

EDUCATION

B.Tech. Building Technology,

Federal University of Technology, Akure,

SEPT 2015-OCT 2021
